

Solar
Made
Simple.

Otter Energy is Ontario's leader in commercial-scale Solar and Battery Storage System Design, Installation Operation and Maintenance

Otter Energy has installed more than 300,000 solar panels.

We're proud to be the #1 choice of Ontario property owners looking to take charge of their energy costs while increasing the value of their most significant asset.

The Otter Energy Advantage

1. We've been making solar simple **since 2009**
2. **Over 300,000 solar panels** / 120 MW of solar generation installed
3. **Deep construction roots.** Development and financing 2016-Present
4. **Extensive and proven track record** working with some of Canada's largest landlords, contractors and owner-users to build and operate commercial-scale systems throughout Ontario.
5. The only solar provider in Canada that is **ISO:9001 certified**

“ The foundation of our company culture is measured excellence and attention to detail ”

Why Work with Otter?

EXPERIENCE

A portfolio spanning a diverse set of large-scale commercial, multi-unit residential, warehouse, municipal, manufacturing and agricultural projects.

CONNECTED

We know how to work with local hydro companies to overcome interconnection challenges for large-scale Net Metering.

PREFERRED PRICING

We do a high volume of work, so we can offer preferred pricing for all the equipment we install.

FULL CONTROL

Our in-house teams of engineers, designers, procurement specialists, project managers, electricians and mechanical professionals ensure projects move smoothly.

SEAMLESS INTEGRATION

Our in-house teams (engineering, electrical, mechanical) get involved early to ensure seamless integration into the overall project.

QUALITY CONTROL

We are Canada's ONLY ISO9001 certified solar company - we submit to annual audits to ensure we continually exceed the highest levels of process and quality.

Unlock the hidden value in your property

On-site solar generation provides an immediate and permanent reduction in a facility's energy costs and CO2/GHG footprint while also delivering an attractive ROI and substantial tax benefits.

WHY SOLAR? — CAP RATE EFFECT

Solar provides immediate and sustained energy cost savings, resulting in a permanent decrease in OpEx and a permanent increase in NOI. This translates into an increase in asset value for income properties on day one.

WHY SOLAR? — CO2/GHG REDUCTION

Solar provides an immediate and sustained reduction in building CO2 and Greenhouse Gas emissions. Solar significantly outperforms green roofs in terms of energy savings and GHG reductions per square foot.

WHY SOLAR? — SUBMETERING REVENUE

Unit submetering creates additional revenue streams from solar on residential and commercial income properties.
