

Solar Made Simple.

Ontario's Rooftop Solar Panel Experts

For agricultural, commercial and residential customers who want freedom and predictability from their hydro-bill, Otter Energy is Ontario's leading team of solar power professionals.

- Over 250,000 solar panels and 100 MW of solar generation installed since 2009
- Deep construction roots and experience working with a diverse set of solar projects (i.e. warehouses, schools, manufacturing, First Nations) as well as retrofits and new buildings
- All design, procurement and labour is performed by our bonded, full time team of solar experts
- Canada's only ISO:9001 certified solar provider

Otter Energy customers save an average of 70-80% on their hydro bills

Unlock The Hidden Value In Your Property

Otter Energy's Core Expertise Is Solar System Design And Installation

Otter Energy focuses on providing turnkey engineering, procurement and construction of premium solar energy solutions.

For over a decade, we've perfected how we install solar panels and design cost-saving solar net metering systems for your farm, business or home.

We have become Ontario's leading solar provider while others have left the market. Why?

Our experience lets us make the whole process of moving to solar simple, and we create value for our customers every step of the way.

Proud solar solution provider for:
